List of accredited sites and scope available on www.cofrac.fr

PREFACE

Bureau Veritas has the pleasure in handing to you this verification report. This report replaces any temporary reports issued by our inspector at the time of his intervention(s).

This report includes a slip for each machine which mentions the applied regulations, the identity of the machine, the basic technical specifications, any actions needed and the details of the service rendered by Bureau Veritas, with the means provided.

REMINDER OF THE EMPLOYER'S OBLIGATIONS

Based on all the information in his possession and especially the "general advice" of this report, the client decides whether or not to put each equipment into service, (depending on the type of verification).

The client should keep a safety register for each site, enter the verification results and join this report.

Finally, the client should keep a maintenance document for each lifting apparatus, enter all the maintenance work and verifications and make it available to the checking body at the next verification.

Personnel training:

The operation of motorised mobile lifting equipment is reserved for workers having received adequate training. This training should be updated as and when needed. For the operation of the following equipment, the workers should have an operating permit, (driving authorization; Décret et Arrêté du 02/12/1998 FR).

PERSONS ENCOUNTERED

On our arrival, we presented ourselves to Mr FERCHAUD.
